## DETAILED ACTION

### *Election/Restrictions*

1. The application contains a plurality of disclosed patentably distinct species comprising

(1) the specifics of an exposure device having a liquid crystal shutter for forming a latent image on a photosensitive medium comprising a first embodiment corresponding to Figures 1a-1b;

(2) the specifics of the liquid crystal shutter device with no spacers in the form of a partitioning wall comprising a second embodiment corresponding to Figures 2a-5d;

(3) the specifics of the liquid crystal shutter device with two spacers in the form of a partitioning wall between each of the shutter rows comprising a third embodiment corresponding to Figures 6-8;

(4) the specifics of the liquid crystal shutter device with four spacers in the form of a partitioning wall between and outside of each of the shutter comprising a fourth embodiment corresponding to Figure 9;

(5) the specifics of the liquid crystal shutter device with four spacers in the form of a partitioning wall between and outside of each of the shutter and each of the spacers having intermediate notches comprising a fifth embodiment corresponding to Figures 10-12;

(6) the specifics of the liquid crystal shutter device with drive circuits arranged beside each of the shutter rows comprising a sixth embodiment corresponding to Figures 13-14b;

(7) the specifics of the liquid crystal shutter device with drive circuits arranged in opposed position with respect to the shutter rows comprising a seventh embodiment corresponding to Figures 15-16b;

(8) the specifics of the method of making a liquid crystal shutter with drive circuits arranged beside each of the shutter rows comprising an eighth embodiment corresponding to Figure 17.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Y. Wang whose telephone number is 571-272-2304. The examiner can normally be reached on M-F, 8 am - 4:30 pm.
